SOFTWARE ENGINEERING PROFILE

- Computer Science undergraduate (CGPA: 8.0) with hands-on experience in full stack development, building scalable and production-ready web applications; seeking an entry-level Software Engineer role.
- Strong in Java and Python with solid foundations in OOP and DBMS; experienced in designing backend logic, integrating APIs, and solving real-world problems through efficient and maintainable code.

EDUCATION

B.E. Computer Science and Engineering

2023 – 2027

Dhanalakshmi Srinivasan Engineering College (Autonomous Institution)

Current CGPA: 8.0 (up to 6th Semester, 3 semesters remaining)

Relevant Coursework: Data Structures & Algorithms, OOP, DBMS, Operating Systems

Class XII – CBSE

Completed 2023

Aristo Public School, Cuddalore

Completed 2021

Percentage: 64.4%

Class X – CBSE

Aristo Public School, Cuddalore

Percentage: 67.6%

TECHNICAL SKILLS

Languages: Java, Python, C

Web Technologies: HTML5, CSS3, JavaScript (ES6)

Database & Tools: MySQL, Git, GitHub, VS Code

Core Concepts: OOP, Data Structures & Algorithms, DBMS, Operating Systems, REST APIs

INTERNSHIP EXPERIENCE

Full Stack Developer Trainee – Edu Tantr

Aug 2024 – Oct 2024

- Built 5+ responsive UI components using HTML, CSS, and JavaScript, reducing layout inconsistencies by 40% across the web application.
- Developed Java backend modules and resolved 15+ reported bugs through root-cause analysis, improving overall application stability by 20%.
- Integrated frontend interfaces with MySQL databases via JDBC, implementing CRUD operations that cut manual data-entry workflows by 30%.
- Collaborated in a 4-member agile team using Git/GitHub, reviewing code and merging 10+ feature branches with zero integration conflicts.

PROJECTS

Smart Expense Manager – Personal Finance Dashboard

Tech Stack: HTML5, CSS3, JavaScript, Chart.js, Local Storage | Concepts: CRUD Operations, Data Visualization, Client-side Storage, Responsive Web Design

- Developed a responsive personal finance dashboard featuring CRUD operations, search, category filtering, and CSV export.
- Integrated Chart.js visualizations to provide interactive analytics for expense insights and budget utilization.
- Implemented client-side persistent data management using browser Local Storage and designed a glassmorphism UI with dark mode.

HealthAI – Full Stack Healthcare Prediction Platform

Tech Stack: Next.js, FastAPI, Python, Scikit-learn, Render, Vercel | Concepts: REST APIs, ML Integration, Full Stack Deployment

- Developed a full-stack AI healthcare platform featuring role-based dashboards (Patient, Hospital, Admin) for disease risk prediction.
- Built a FastAPI backend integrating scikit-learn machine learning models with robust API endpoints and routing.
- Designed responsive Next.js frontend interfaces and deployed the system seamlessly across Vercel and Render.

Smart Footstep Power Generation System (Piezoelectric IoT Project)

Tech Stack: Arduino, Piezoelectric Sensors, Embedded C | Concepts: Energy Harvesting, IoT Systems, Sensor Integration

- Designed a piezoelectric energy harvesting system converting footstep pressure to electrical energy for low-power IoT devices.
- Integrated piezoelectric sensors with Arduino to capture, condition, and monitor real-time voltage output.
- Built and tested a functional prototype powering LEDs and sensor modules, validating it as a self-sustaining IoT power source.

CERTIFICATIONS

- Full Stack Development – Internship Completion Certificate, Edu Tantr (Oct 2024)
- NPTEL – Python for Data Science | Score: 61% | IIT Madras
- NPTEL – Introduction to Machine Learning | Score: 56% | IIT Madras
- NPTEL – Cyber Security and Privacy | Score: 60% | IIT Madras
